Hot Water at Will

RenEnS Solar Heater suits all your need. It is flexible – No matter if it is an apartment, a House, a Residential or a Hotel project.

Designed for heating

Vacuum tube collectors are considered as the best performing, Cost effective means of water heating using the solar energy. UV rays are captured and the water heats up even on cloudy days.

Keeps water hot for 3 days

Maximum thermal insulation with a sustainable high density poly urethane puffing. The vacuum collectors act as thermos.

Food grade Stainless Steel 304

0.50mm Food Grade SS 314 inner tank

Aluminium outer tank

Eye catching outer tank made of aluminium, prevents rusting.
